1. Introduction

1.1 The statutory framework for the Early Years Foundation Stage

The Early Years Foundation Stage (EYFS) is the statutory framework published in 2012 by the Department for Education that sets the standards for the development, learning and care of children from birth to five.

The Childcare Act Section 39(1)(a) 2006 stipulates that Early Years providers must ensure that their provision meets the learning and development requirements as specified in the EYFS (Learning and Development Requirements) Order 2007 (amended in 2012). The Act states that this Order can specify the arrangements which are required for assessing children for the purpose of ascertaining what they have achieved in relation to the early learning goals (ELGs).

As an executive agency of the Department, the Standards and Testing Agency (STA) is responsible for the development and delivery of statutory assessment through the EYFS Profile and at key stages 1, 2, and 3. It will ensure that EYFS Profile outcomes are reliable as a result of robust moderation.

All English local authorities must have regard to any guidance produced by STA in exercising their function under the EYFS (Learning and Development Requirements) Order 2007, Section 4.2. The learning and development requirements are given legal force by an Order made under Section 39(1) (a) of the Childcare Act 2006. This can be viewed on the Government's legislation archive at: www.legislation.gov.uk/uksi/2007/1772/article/3/made.

1.2 The EYFS Profile

The EYFS Profile summarises and describes children's attainment at the end of the EYFS. It is based on ongoing observation and assessment in the three prime and four specific areas of learning, and the three learning characteristics, set out below:

The prime areas of learning:

- communication and language
- physical development
- personal, social and emotional development

The specific areas of learning:

- literacy
- mathematics
- understanding the world
- expressive arts and design

The learning characteristics:

- playing and exploring
- active learning
- creating and thinking critically

A completed EYFS Profile consists of 20 items of information: the attainment of each child assessed in relation to the 17 ELG descriptors, together with a short narrative describing the child's three learning characteristics.

Assessments will be based primarily on observation of daily activities and events. Practitioners should note in particular the learning which a child demonstrates spontaneously, independently and consistently in a range of contexts. Accurate assessment will take account of a range of perspectives including those of the child, parents and carers and other adults who have significant interactions with the child.

For each ELG, practitioners must judge whether a child is meeting the level of development expected at the end of the Reception Year (expected), exceeding this level (exceeding), or not yet reaching this level (emerging).

The completed EYFS Profile must include a short commentary on each child's skills and abilities in relation to the three key characteristics of effective learning. This will support future curriculum planning and will provide the Year 1 teacher with important information about each child's approach to learning.

1.3 Ongoing assessment

The Government does not prescribe how ongoing assessment should be undertaken. In addition to the statutory framework, an updated version of the non-statutory Development matters guidance was published alongside the EYFS in March 2012. Early Years providers will find these useful in helping them to make judgements about the ongoing monitoring and assessment of children, prior to undertaking the EYFS Profile. Both documents are available on the Department's website at www.education.gov.uk/eyfs.

The EYFS Profile is not intended to be used for ongoing assessment or for entry level assessment for Early Years settings or Reception classes.

1.4 Structure of this Handbook

The *Handbook* has been developed to support practitioners in making accurate judgements about each child's attainment. It also provides exemplification to enable effective moderation of judgements so that EYFS Profile outcomes are accurate and consistent across all settings. This *Handbook* is effective from September 2012, replacing the previous *EYFS Profile Handbook* (Qualifications and Curriculum Authority, 2008).

Sections 1–8 of this document provide advice and guidance on the various elements of EYFS Profile assessment, in particular:

- principles, purposes and processes of the EYFS Profile;
- completing the EYFS Profile;
- exemplification of the ELGs;

- documenting each child's attainment;
- inclusion;
- moderating EYFS Profile judgements; and
- quality assuring the assessments.

A range of documents and web based resources have been developed to assist practitioners in completing EYFS Profiles. These give the background to the statutory framework, and detail specific aspects of moderation, reporting to parents and data collection. All these resources are available on the Department's website at www.education.gov.uk/eyfs.

The term 'parent' is used in this document as defined in section 576 of the Education Act 1996 as:

- parents of a child;
- any person who is not a parent of a child but who has parental responsibility for the child; and
- any person who has care of the child.

All references to EYFS settings include any out-of-home provider of Early Years provision for children from birth to five, such as childminders, local authority nurseries, nursery or Early Years centres, children's centres, playgroups, pre-schools, or schools in the independent, private or voluntary sector and maintained schools.

2. EYFS Profile purposes, principles and processes

2.1 Purposes and main uses of the EYFS Profile

The EYFS (Learning and Development Requirements) Order 2007 as amended by The EYFS (Learning and Development Requirements) (Amendment) Order 2012 specifies the learning and development requirements and gives legal effect to the EYFS statutory framework. The framework requires that the EYFS Profile is carried out in the final term of the year in which the child reaches age five, and no later than 30 June in that term.

The primary purpose of the EYFS Profile is to provide a reliable, valid and accurate assessment of individual children at the end of the EYFS.

The primary uses of EYFS Profile data are as follows. These have informed the development of the Profile.

- To inform parents about their child's development against the ELGs and the characteristics of their learning.
- To support a smooth transition to Key Stage 1 by informing the professional dialogue between EYFS and Key Stage 1 teachers.
- To help Year 1 teachers plan an effective, responsive and appropriate curriculum that will meet the needs of all children.

In addition, the Department considers that a secondary purpose of the assessment is to provide an accurate national data set relating to levels of child development at the end of the EYFS which can be used to monitor changes in levels of children's development and their readiness for the next phase of their education both nationally and locally (school-level results will not be published in the Performance Tables).

The EYFS Profile has been designed to be valid and reliable for these purposes.

2.2 Principles of EYFS Profile assessments

How an EYFS Profile is completed

Reliable and accurate assessment at the end of the EYFS is underpinned by the following principles:

- Reliable and accurate assessment is based primarily on the practitioner's knowledge of the child gained predominantly from observation and interaction in a range of daily activities and events.
- Responsible pedagogy must be in place so that the provision enables each child to demonstrate their learning and development fully.
- Embedded learning is identified by assessing what a child can do consistently and independently in a range of everyday situations.
- An effective assessment presents a holistic view of a child's learning and development.
- Accurate assessments take account of contributions from a range of perspectives including the child, their parents and other relevant adults.

Observational assessment

Observational assessment involves reaching an understanding of children's learning by watching, listening and interacting as they engage in everyday activities, events and experiences, and demonstrate their specific knowledge, skills and understanding.

It is the most reliable way of building up an accurate picture of children's development and learning, especially where the attainment demonstrated is not dependent on overt adult support. Observational assessment is key to understanding what children really know and can do.

Some observations will be planned but some may be a spontaneous capture of an important moment. It is likely that observations of everyday activities will provide evidence of attainment in more than one area of learning.

Observational assessment does not require prolonged breaks from interaction with children, nor excessive written recording. It is likely to be interwoven with high quality interactions or conversations in words or sign language with children about their activities and current interests.

Responsible pedagogy

Responsible pedagogy enables each child to demonstrate learning in the fullest sense. It depends on the use of assessment information to plan relevant and motivating learning experiences for each child. Effective assessment can only take place when children have the opportunity to demonstrate their understanding, learning and development in a range of contexts.

Children must have access to a rich learning environment which provides them with the opportunities and conditions in which to flourish in all aspects of their development. It should provide balance across the areas of learning. Integral to this is an ethos which respects each child as an individual and which values children's efforts, interests and purposes as instrumental to successful learning.

Practitioners should consider the following when evaluating the effectiveness of their assessment processes:

- child development, both the biological and cultural aspects, and its impact on how learning may best be supported;
- planning which ensures a relevant, motivating, flexible and interesting curriculum;
- provision of an environment which truly enables successful learning by all children in their care;
- the need for detailed understanding of the framework for assessment in order to gather accurate, reliable and meaningful information;
- the importance of high quality adult interaction which is sensitive and adaptive to the needs of individual children and capable of promoting learning; and
- organisational aspects of provision, resources, curriculum and people.

The successful implementation of these aspects of pedagogy and provision provides the route from practitioner observation of individual children to an accurate, reliable and consistent assessment of their learning which will inform planning for Year 1.

Child initiated activity

Key aspects of effective learning characteristics include children:

- being willing to have a go;
- being involved and concentrating;
- having their own ideas;
- choosing ways to do things;
- finding new ways; and
- enjoying achieving what they set out to do.

Accurate assessment of these characteristics depends on observing learning which children have initiated rather than only focussing on what they do when prompted. For children to develop learning characteristics to be assessed by the EYFS Profile, and to support lifelong learning, they require rich opportunities to initiate ideas and activities.

Embedded learning and secure development

A child's embedded learning and secure development are demonstrated without the need for overt adult support. Where learning is secure it is likely that children often initiate the use of that learning. Judgements about this are made through observing behaviour that a child demonstrates consistently and independently, in a range of situations. Attainment in this context will assure practitioners of the child's confidence and ownership of the specific knowledge, skill or concept being assessed. Skilful interactions with adults and learning which is supported by them are necessary on the journey to embedding skills and knowledge.

Links in the areas of learning

Areas of learning, and therefore the ELGs, are often interlinked. These in turn may be related to the characteristics of learning. Seeing these links will bring coherence to the assessment process and enable practitioners to capture each child's learning more effectively and genuinely. Practitioners can also reflect on these links when quality assuring their assessment judgements by examining whether the different aspects and levels of attainment make sense when considered together.

Practitioner knowledge

The majority of evidence for EYFS Profile judgements will come from the practitioner's knowledge of the child gained from observation of the child's self-initiated activities. In addition, some adult-led activities will offer insight into children's attainment, where they have the opportunity to demonstrate what they know, understand and can do.

Much evidence will be gleaned from day to day interactions with children as practitioners build up their knowledge of what children know and can do, for assessment purposes and to inform future practice and provision. This evidence, often not formally recorded, provides the basis on which judgements are made and the focus of a moderation dialogue.

Contributions to the assessments

Accurate assessment will depend on contributions from a range of perspectives including the child's. Practitioners should involve children fully in their own assessment by encouraging them to communicate about and review their own learning. Assessment should build on the insights of all adults who have significant interactions with the child. Adults with different roles will have different insights.

Accurate assessment requires a two-way flow of information between setting(s) and home. Reviews of the child's achievements should include those demonstrated at home as assessment without the parents' contribution provides an incomplete picture of a child's learning and development.

2.3 EYFS Profile assessment processes

During the final year of the EYFS, practitioners must undertake ongoing (formative) assessment to support each child's learning and development. There is no requirement that this is recorded in any specific manner or at specified points in time; practitioners should be mindful of their professional responsibility for the learning and development of every child in their care and plan the provision needed to enable children to take the next steps in their learning.

In the final term of the EYFS practitioners must review their knowledge of each child using information from all sources to make a judgement for each ELG.

Practitioners must make a judgement for each ELG as to whether the child's learning and development is best described by:

- the description of the level of development expected at the end of the EYFS (expected);
- not yet at the level of development expected at the end of the EYFS (emerging); or
- beyond the level of development expected at the end of the EYFS (exceeding).

In making this decision, practitioners must refer to the exemplification material which is available on the Department's website at www.education.gov.uk/assessment. This material illustrates the standard expected for each ELG at the end of the EYFS.

Practitioners must consider the entirety of each ELG and avoid splitting the descriptor into sections and ticking them off when making the decision. To create the most accurate picture of the child's overall embedded learning an holistic view of the descriptor should be taken.

Judging whether a child's learning and development best fits the 'expected' category

A child's learning and development can be judged to be at the level expected at the end of the EYFS if the ELG description and accompanying exemplification best fit the practitioner's professional knowledge of the child.

Because children do not necessarily achieve uniformly, the practitioner should judge whether the description within the ELG best fits the child's learning and development, taking into account their relative strengths and weaknesses. 'Best fit' does not mean that the child has equal mastery of all aspects of the ELG. Practitioners should look to the whole of each ELG description when making this summative judgement.

If a child's learning and development does not best fit the 'expected' category

Where a child's learning and development does not yet meet what is expected at the end of the EYFS, then their learning and development is said to be at the emerging level for that ELG. If a child's learning and development goes beyond the expected category

Where a child's development exceeds that set out as that expected at the end of the EYFS, attainment should be recorded within the EYFS Profile as being at the exceeding level for that ELG.

To judge whether a child's learning and development is exceeding, practitioners should use the best fit model and be confident that the child has moved beyond the expected level.

Practitioners should:

- consider the Key Stage 1 attainment targets and level descriptors;
- refer to exceeding descriptors (sourced from the Tickell review) which are provided in Annex 2 of this handbook; and
- discuss with Year 1 teachers whether to deem a child exceeding in any ELG.

Arrangements for the exceeding level are interim and are subject to change once the National Curriculum review is complete.

2.4 Evidence and documentation of the assessments

Practitioners should build their knowledge of what each child knows and can do over the course of the year, so that they can make an accurate end of year judgement. Settings may choose to record children's learning in any way which suits their purposes. These purposes will include supporting children's learning and development and making accurate summative assessments.

At the end of the year, practitioners must make their final EYFS Profile assessments based on all their evidence. This breadth of professional knowledge, and the exemplification of standards set out in this handbook, should be used to make judgements as to whether a child's learning meets the level expected at the end of EYFS, exceeds that level or is best described as at an emerging level. Practitioners will also use the handbook when describing each child's characteristics of learning. These judgements are then subject to moderation in order to ensure national consistency and accuracy.

Practitioners and EYFS Profile moderators should be aware that the definition of evidence is any material, knowledge of the child, anecdotal incident or result of observation or information from additional sources that supports the overall picture of a child's development. There is no requirement that it should be formally recorded or documented; the extent to which the practitioner chooses to record information will depend on individual preference. Paperwork should be kept to the minimum that practitioners require to illustrate, support and recall their knowledge of the child's attainment.

An EYFS Profile completed by the practitioner alone will offer only a partial picture of a child's attainment. Practitioners must actively engage children, their parents and carers, and other adults who have significant interaction with the child in the assessment process.

Practitioners may include the following to support their judgements:

- knowledge of the child;
- materials which illustrate the child's learning journey, such as photographs;
- observations of day to day interactions;
- video/tape/electronic recordings;
- the child's view of his or her own learning;
- information from parents and carers; and
- information from other relevant adults.

No assessments other than the EYFS Profile are required or expected.

2.5 Use of the EYFS Profile for transition to Year 1

The transition between the EYFS and Year 1 should be seamless. EYFS practitioners and Year 1 teachers should work together to ensure that children's learning experiences in the final year of the EYFS are valuable in themselves, and prepare the ground for their move to Year 1. It is important that Year 1 builds on the successful principles and approach encapsulated in the EYFS.

It is crucial that EYFS practitioners and Year 1 teachers are allocated time to discuss and expand on the information presented in the EYFS Profile. The statutory requirement at the end of EYFS is to make an accurate judgement between the three outcome bands of the EYFS profile for each of the 17 ELGs and complete the learning characteristic narratives. A principled approach to assessment ensures that a detailed holistic picture of each child's learning and development accompanies the 17 ELG decisions. The learning characteristic narratives will provide significant additional detail for each child and must be included in the transition dialogue.

Beyond the 20 items of the EYFS profile, practitioners may provide any additional information needed to enable Year 1 teachers to plan an effective curriculum and provision for all children. Decisions about this additional information should be made by each setting and reflect the characteristics and requirements of that setting. This will enable the Year 1 teacher to have a fully rounded picture of the attainment of each child in order to plan the curriculum. Year 1 teachers should be involved in EYFS Profile moderation in order for them to understand the judgements made by Early Years practitioners.

3. Inclusion

The EYFS Profile is an inclusive assessment, capable of capturing a wide range of children's learning and development outcomes. For some children, the processes of observation and assessment present a particular challenge to practitioners, which must be addressed for attainment to be accurately judged and recorded. This challenge applies both to

- understanding how some children might demonstrate attainment at the level expected at the end of the EYFS; and
- how to capture the attainment of children whose development is judged to be at the emerging level.

3.1. Children with special educational needs and disability

The range of special educational needs and disability (SEND) is diverse and includes physical, emotional, sensory and learning needs.

For children with SEND the setting will develop additional relationships with other professionals. It is vital that communication between all professionals and the child's parent is strong so that a clear picture is gained of the child's learning and development.

Observational assessment is the most effective way of making judgements about all children's learning and development. Depending on their special educational need, children will demonstrate their learning and development in different ways. Practitioners observing the child involved in day to day activities must take account of the following:

- where any item in the EYFS Profile contains the word 'talks' or 'speaks' children can use their established or preferred mode of communication; and
- the need to be alert to the child demonstrating attainment in a variety of ways, including eye pointing, use of symbols or signs.

Any adaptations children use to carry out their activities, such as mobility aids, magnification or adapted ICT and equipment, should be employed so that practitioners come to know all children at their most capable.

Where a child's learning and development does not yet meet the description of the level expected at the end of the EYFS for an individual ELG, the outcome will be recorded as emerging. Further information is available in the Development matters guidance, which is available from the Department's website at www.education.gov.uk/eyfs. The child's learning should be described in relation to these earlier developmental statements. Practitioners should also record details of any specific assessment and provision in place for the child, and use this comprehensive record as a basis for discussion with parent/carers and to support planning for future learning. This will ensure that parents and carers have a clear, rounded picture of their child's development and are informed about additional support and future activities.

Please note that P scales are an assessment tool designed for use at Key Stage 1 and should not be used for assessing children in the EYFS. As stated earlier, in these instances practitioners should refer to the Development matters guidance.

3.2 Children for whom English is not their home language

The communication skills of children for whom English is not their home language are not all the same. These children will be at different stages of learning English and one or more other languages. Learning English as an additional language is not a special educational need. Practitioners need to find out as much as they can about a child's prior language experience and any education experienced elsewhere. Parents, as the first educators, are an important source of information.

Underpinning the EYFS Profile assessment is the understanding that language is central to our sense of identity and belonging to a community, and that linguistic diversity is a strength that is recognised and valued. Practitioners may need to share with parents the understanding that a child's home language development will help them learn English.

Parents also need to know that it is perfectly acceptable, even desirable, for the child's home language to be used in the setting. Practitioners will need to observe the child over time and raise questions with the parents, and/or bilingual support assistants, to be confident about what the child knows and understands.

There are three aspects specific to the assessment of children for whom English is not their home language:

- development in their home language;
- development across areas of learning, assessed through their home language; and
- development of English.

Within the EYFS Profile, the ELGs for communication and language and for literacy must be assessed in relation to the child's competency in English. The remaining ELGs may be assessed in the context of any language – including the child's home language and English.

This has implications for provision. The principles of good practice for children learning English are the principles of good practice for all children. Children must have opportunities to engage in activities and first hand experiences that do not depend solely on English for success, and where they can participate in ways that reveal what they know and can do in the security of their home language. For children to grow in confidence, and hence demonstrate their embedded learning, their environment must reflect their cultural and linguistic heritage and their learning be supported by a wide range of stimuli and experiences.

3.3 Children from minority groups

The ethnicities of children within a setting can be diverse, particularly in urban settings. The children may be refugees or asylum seekers, their families may have histories of persecution and trauma, or they may have had positive experiences but different cultural conventions governing behaviours and gender roles. This cultural background may also determine how early education is perceived, and how much experience of school or another Early Years setting the child may have had prior to their EYFS Profile assessment.

Children may come from settled communities or travel frequently. This latter consideration affects not only minority groups such as Gypsy, Roma and Traveller children but also other groups such as children with armed forces, embassy and global corporate backgrounds.

Practitioners must take particular care that the environment echoes children's own positive experiences. Children will be able to demonstrate their attainment when opportunities such as role play, cookery, celebrations and visits to special places or events are linked to their cultural experience. This will also be captured in the narrative relating to characteristics of learning, where the child's ability to begin their play and exploration with things which are familiar and build new knowledge and learning from this starting point, are expressly considered (Playing and exploring: using what they know in their play).

The relationship with parents is crucial to developing the practitioners' knowledge of the child and their ability to make an accurate assessment. Parents can help practitioners understand the different values that explain their child's responses to the environment and social situations. A child will find it easier to express their feelings and feel confident in their learning if practitioners listen and respond in ways that show understanding.

3.4 Taking account of the needs of individual children

Reaching accurate assessments using the EYFS Profile requires practitioners to enable all children to reach their full potential. Consequently, practitioners must be alert to the general diversity of children's interests, needs and inclinations.

For instance, there may be children who are at an earlier stage of development than others in the cohort; some may have summer birthdays. These children and others may be highly active and more likely to demonstrate what they know, understand and can do in situations which are sympathetic to this inclination, often outdoors.

Practitioners should reflect on their observations and ensure that the provision enables all children, regardless of their stage of development or interests, needs and inclinations, to demonstrate attainment in ways that are motivating to them.

3.5 Transition conversations for children with an outcome at the emerging level.

Where children have an outcome of emerging for an ELG within the EYFS Profile, it is likely that this will not provide full information about their learning and development at the end of the EYFS. Additional information should be considered alongside EYFS Profile outcomes, to ensure that conversations between EYFS and Year 1 staff are meaningful, and lead to successful transition for the child.

An outcome of emerging may mask a wide range of levels of learning and development, the detail of which is built over time through observation, interaction with the child and ongoing assessment. There are many sources of information about how children learn and develop, how this may be manifested and how further learning and development might be supported. There is no requirement on practitioners to use any specific source of information in this context.

Specialist professional guidance is available for many specific special educational needs and disabilities and children with SEND may have records from professionals within and outside of the setting. These records should inform assessment and transition processes and, wherever possible, other professionals working with the child should be invited to contribute to transition conversations.

The Development matters guidance provides one source of detailed information about children's learning and development prior to reaching the level expected at the end of the EYFS, and practitioners may find this a useful point of reference when summarising a child's development at the emerging level, where additional detail is needed. Development matters is not designed as an assessment tool or checklist, but could underpin the development of shared understanding between EYFS and Year 1 colleagues about individual children.

The provision of additional information around the 20 items of the EYFS Profile, in order to support successful transition and a smooth learning journey for the child, should be considered by settings in advance of the summer term so that processes can be built on shared understanding, thoroughly planned, and implemented in good time. Decisions about what sources of guidance might be used and what additional information shared, should be made at a setting level and reflect local needs and circumstances.

4. Completing the EYFS Profile

Settings should refer to the 2013 EYFS *Assessment and reporting arrangements (ARA)* for more information about current requirements.

4.1 Making EYFS Profile assessments

Assessment against the 17 ELGs and the three characteristics of learning must be made in the summer term of the academic year in which the child reaches age five, in accordance with the statutory framework.

Taking into account all the evidence from a range of sources, practitioners will match their view of each child's attainment to the exemplification of national standards and the guidance on characteristics of learning. This will lead to judgements of attainment and to the nature of each child's learning characteristics.

4.2. Recording children's attainment

Once EYFS Profile judgements have been made the practitioner should record each child's level of development against the 17 ELGs as emerging, expected or exceeding. Practitioners must complete the profile with a brief commentary on the child's skills and abilities in relation to the three key characteristics of effective learning, following the guidance in section 4.4.

A sample proforma to support recording is provided in Annex 1, although there is no requirement for settings to use this format.

4.3 Exceptions and exemptions

The EYFS Profile should be completed during the summer term of the academic year in which a child reaches age five unless:

- an exemption from the Profile has been granted for the setting or an individual child by the Secretary of State;
- the child is continuing in EYFS provision beyond the year in which they turn five;
- the child has recently arrived from abroad and so an accurate and valid assessment cannot be completed; or
- the child has spent a lengthy period of time away from the setting, for example, due to illness or medical treatment.

In these instances the practitioner should refer to the ARA for further guidance about the circumstances in which these decisions will be considered valid, and the associated requirements placed upon settings.

4.4 Characteristics of effective learning

The characteristics of effective learning describe factors which play a central role in a child's learning and in becoming an effective learner. They are vital elements of support for the transition process from EYFS to Year 1. The characteristics of learning run through and underpin all seven areas of learning and development, representing processes rather than outcomes. Information describing the child's characteristics of effective learning will provide Year 1 teachers with vital background and context when considering the child's next stage of development and future learning needs.

The commentary should consist of a short description (i.e. one to two paragraphs) of how the child demonstrates the three key characteristics of effective learning:

- playing and exploring;
- active learning; and
- creating and thinking critically.

These descriptions must reflect ongoing observation of the child within formative assessment processes and should take account of all relevant records held by the setting and include information from the child, their parents and other relevant adults.

The table below provides information relating to each of the characteristics of effective learning.

Please refer to Annex 3 for examples of some possible lines of enquiry when completing the commentary for each characteristic of effective learning.

Playing and exploring - engagement

Finding out and exploring is concerned with the child's open-ended hands-on experiences which result from innate curiosity and provide raw sensory material from which the child builds concepts, tests ideas and finds out.

Using what they know in their play describes how children use play to bring together their current understandings, combining, refining and exploring their ideas in imaginative ways. Representing experiences through imaginative play supports the development of narrative thought, the ability to see from other perspectives, and symbolic thinking.

Being willing to have a go refers to the child finding an interest, initiating activities, seeking challenge, having a 'can do' orientation, being willing to take a risk in new experiences, and developing the view of failures as opportunities to learn.

Active learning - motivation

Being involved and concentrating describes the intensity of attention that arises from children concentrating on following a line of interest in their activities.

Keeping on trying refers to the importance of persistence even in the face of challenge or difficulties an element of purposeful control which supports resilience.

Enjoying achieving what they set out to do refers to the reward of meeting one's own goals, building on the intrinsic motivation which supports long-term success, rather than relying on the approval of others.

Creating and thinking critically - thinking

Having their own ideas covers the critical area of creativity - generating new ideas and approaches in all areas of endeavour. Being inventive allows children to find new problems as they seek challenge, and to explore ways of solving these.

Using what they already know to learn new things refers to the way in which children develop and link concepts, find meaning in sequence, cause and effect and in the intentions of others through both narrative and scientific modes of thought.

Choosing ways to do things and finding new ways involves approaching goal-directed activity in organised ways making choices and decisions about how to approach tasks, planning and monitoring what to do and being able to change strategies.

4.5 Reporting the EYFS Profile assessment

All EYFS providers completing the EYFS Profile must give parents a written summary of their child's attainment using the 17 ELGs and a narrative on how a child demonstrates the three characteristics of effective learning.

Year 1 teachers must be given a copy of the EYFS Profile report together with a narrative on how the child demonstrates the three characteristics of effective learning.

All EYFS providers must report EYFS Profile data (the 17 ELGs) to their local authority for each child, upon request. The narrative on how a child demonstrates the three characteristics of effective learning should not be submitted.

Some children may have attended a range of settings during the final year of the EYFS. In these cases the EYFS Profile must be completed by the provider where the child spends the majority of their time between 8.00am and 6.00pm. If a child moves during the summer term, providers must agree which of them will complete the profile. Providers should consider all available records of any formal or informal discussions with parents and others involved with the child during the previous year.

Reports should be specific to the child, concise and informative. They may include details from ongoing assessment, links to age related bands in Development matters and details from any other assessments appropriate to the individual child in order to help to identify the appropriate next steps in learning.

Detailed requirements around completion of the Profile, and reporting and informing parents and carers about their child's progress are set out in the EYFS ARA.

5. Exemplification of expected descriptors

5.1 Introduction

The exemplification establishes the national standard for the level of learning and development expected at the end of EYFS for each of the 17 ELGs of the EYFS Profile. It provides a single point of reference for:

- practitioners to make accurate judgements for each child's attainment;
- moderators to assess the accuracy of practitioner judgements;
- Year 1 teachers to use EYFS Profile outcomes to plan effective provision; and
- other stakeholders who wish to evaluate children's learning and development.

Practitioners should use the exemplification to inform their decisions as to whether a child has met the level of development expected at the end of the EYFS for each ELG, has exceeded that level or not yet reached it (emerging).

The exemplification includes a variety of evidence and forms of presentation in order to demonstrate the wide range of ways in which information may be gathered to support EYFS Profile judgements. The material includes 'one off' observations, samples of children's work, photographs and contributions from parents. Some examples are part of a collection of material for an individual child or a group of children. There is no prescribed method of gathering evidence as a foundation for EYFS Profile judgements, nor any expectation that evidence should be recorded in this way. There are many methods of recording a child's attainment not included in this exemplification for practical reasons (for example video recordings). Practitioners will also build up a significant professional knowledge of each child which will not be recorded but which must be considered when EYFS Profile judgements are made.

5.2 How to use the exemplification

In order to make judgements about attainment for each ELG, the practitioner must be familiar with the description of the area of learning and that of the level of development expected at the end of the EYFS. These set the context for practitioner judgement and the level of attainment which is expected for each child by the end of the EYFS. Practitioners should also be familiar with the developmental continuum leading to each ELG and may wish to refer to Development matters. Practitioners can ensure their judgements are accurate and consistent by considering each child's learning and development in the light of:

- the area of learning; and
- the level of development expected at the end of EYFS for each ELG, informed by the exemplification.

When completing an EYFS Profile, practitioners are asked to make a best-fit judgement for each ELG using the description of learning and development expected at the end of the EYFS. When making a decision, practitioners must consider the entirety of each ELG. To create the most accurate picture of the child's overall embedded learning, a holistic view of the descriptor should be taken. Sections of each descriptor must not be seen in isolation.

When viewing each set of exemplification it is important to understand that the set as a whole illustrates the 'expected' descriptor. No one piece of evidence meets the ELG as a standalone item; together they illustrate the pitch and breadth of a particular 'expected' level of learning and development.

The prime and specific areas of learning, the aspects of learning and their associated ELGs are set out below. Exemplification material should always be viewed in the context of a specific aspect of learning in order to retain an accurate focus. However, practitioners should be aware that a child's learning and development are not compartmentalised and a focus on one aspect of learning will shed light on several other related areas.

Exemplification of the expected descriptions is available on the Department's website at www.education.gov.uk/eyfs.

5.3 Areas and aspects of learning of EYFS and their associated ELGs

In the following table, the ELGs are numbered according to the statutory data collection. Goals may appear in a different order in other supporting documentation. Please ensure that when discussing EYFS Profile judgements, comments are accurately related to, and recorded against, each individual ELG.

For all the ELGs except speaking, the principle that a child can use their established or preferred mode of communication holds true. In this case additional detail around their understanding and preferred means of communication should accompany their profile record.

Each ELG is followed by a brief explanatory note. The purpose of this is to provide a succinct explanation for each ELG to ensure accuracy and consistency of interpretation by all stakeholders. The explanatory note is not to be used in place of the ELG descriptor for assessment purposes.

EYFS areas of learning and their associated ELGs

Prime areas of learning	
<p>Communication and language development involves giving children opportunities to speak and listen in a range of situations and to develop their confidence and skills in expressing themselves.</p>	
ELG 01	<p>Listening and attention: Children listen attentively in a range of situations. They listen to stories, accurately anticipating key events, and respond to what they hear with relevant comments, questions or actions. They give their attention to what others say and respond appropriately, while engaged in another activity.</p>
<p>Explanatory note: <i>The child listens actively while engaged in a variety of activities from which he or she is able to recall significant details. This includes stories and rhymes. When listening to suggestions or explanations, the child responds appropriately through actions or comments, predicting what might happen or by asking relevant questions. The child remains focused on an activity, can sustain a conversation with someone as they play and perseveres despite distractions showing consistently high levels of involvement.</i></p>	
ELG 02	<p>Understanding: Children follow instructions involving several ideas or actions. They answer 'how' and 'why' questions about their experiences and in response to stories or events.</p>
<p>Explanatory note: <i>The child is able to understand and respond to a series of simple steps in order to complete familiar or unfamiliar activity. The child is able to answer questions about their own activities or experiences and is able to demonstrate understanding by answering questions including 'how' and 'why' about stories and events.</i></p>	
ELG 03	<p>Speaking: Children express themselves effectively, showing awareness of listeners' needs. They use past, present and future forms accurately when talking about events that have happened or are to happen in the future. They develop their own narratives and explanations by connecting ideas or events.</p>
<p>Explanatory note: <i>The child uses speech to recreate, rehearse and reflect on his or her experiences and to clarify ideas and feelings. The child is keen to develop their vocabulary and may demonstrate their understanding of newly learned words by using them in context. The child speaks clearly and with confidence in both familiar and less familiar groups. They demonstrate an awareness of the listener, for example by adding detail to explanations or asking questions in order to find out more information.</i></p>	

Prime areas of learning	
<p>Physical development involves providing opportunities for young children to be active and interactive, and to develop their coordination, control, and movement. Children must also be helped to understand the importance of physical activity, and to make healthy choices in relation to food.</p>	
ELG 04	<p>Moving and handling: Children show good control and coordination in large and small movements. They move confidently in a range of ways, safely negotiating space. They handle equipment and tools effectively, including pencils for writing.</p>
<p>Explanatory note: <i>The child demonstrates coordination and control in both fine and gross motor activities. A range of equipment and tools are manipulated appropriately and confidently. The child shows an awareness of space, adjusting speed and direction purposefully and negotiating small and large spaces successfully and safely. The child competently produces marks with a range of mark making tools.</i></p>	
ELG 05	<p>Health and self-care: Children know the importance for good health of physical exercise and a healthy diet, and talk about ways to keep healthy and safe. They manage their own basic hygiene and personal needs successfully, including dressing and going to the toilet independently.</p>
<p>Explanatory note: <i>The child shows some knowledge and understanding of the factors that contribute to keeping healthy, such as physical exercise and a balanced diet. They are able to express themselves about things they could do to keep themselves healthy and safe. The child shows personal independence by demonstrating healthy practices in their everyday life.</i></p>	

Prime areas of learning	
Personal, social and emotional development involves helping children to develop a positive sense of themselves and others; to form positive relationships and develop respect for others; to develop social skills and learn how to manage their feelings; to understand appropriate behaviour in groups; and to have confidence in their own abilities.	
ELG 06	Self-confidence and self-awareness: Children are confident to try new activities, and to say why they like some activities more than others. They are confident to speak in a familiar group, will talk about their ideas, and will choose the resources they need for their chosen activities. They say when they do or don't need help.
Explanatory note: <i>The child makes choices within their environment and expresses their preferences. The child tries new things, explores resources and tools, and shares their experiences with others including adults, peers or within a group. The child plays independently expressing their ideas and innovations and asks for support when needed.</i>	
ELG 07	Managing feelings and behaviour: Children talk about how they and others show feelings, talk about their own and others' behaviour, and its consequences, and know that some behaviour is unacceptable. They work as part of a group or class, and understand and follow rules. They adjust their behaviour to different situations, and take changes of routine in their stride.
Explanatory note: <i>The child responds appropriately to experiences, communicating his or her needs, views and feelings. The child is aware of the consequences of words and actions and adapts his or her behaviour accordingly. When playing as part of a group, the child takes turns and shares. The child knows the expectations and routines of the setting, applies strategies to respond to changes of routine and offers explanations as to why these are necessary. The child is usually able to adjust his or her behaviour to reflect this understanding.</i>	
ELG 08	Making relationships: Children play cooperatively, taking turns with others. They take account of one another's ideas about how to organise their activity. They show sensitivity to others' needs and feelings, and form positive relationships with adults and other children.
Explanatory note: <i>The child plays co-operatively in a group, sharing and taking turns. When playing together with others, the child usually responds in a friendly and kind way, listening to other children's ideas and points of view. The child interacts positively with other children and adults.</i>	

Specific areas of learning

Literacy development involves encouraging children to read and write, both through listening to others reading, and being encouraged to begin to read and write themselves. Children must be given access to a wider range of reading materials – books, poems, and other written materials, to ignite their interest.

ELG 09

Reading: Children read and understand simple sentences. They use phonic knowledge to decode regular words and read them aloud accurately. They also read some common irregular words. They demonstrate an understanding when talking with others about what they have read.

Explanatory note: *The child uses cues such as pictures, letter/word recognition, knowledge of the story or context and reading for meaning, in order to help them comprehend a range of fiction and non-fiction texts. The child blends and segments words independently and applies their phonic knowledge to regular and irregular unfamiliar words. The child shares his or her feelings and ideas about what they have read with others.*

ELG 10

Writing: Children use their phonic knowledge to write words in ways which match their spoken sounds. They also write some irregular common words. They write sentences which can be read by themselves and others. Some words are spelt correctly and others are phonetically plausible.

Explanatory note: *The child writes for a range of purposes in meaningful contexts. The child's writing may include features of different forms such as stories, lists, labels, captions, recipes, instructions and letters. The child's writing is phonetically plausible when he or she writes simple regular words and particularly when he or she attempts to write more complex words. The child and others can read and make sense of the text.*

Specific areas of learning	
<p>Mathematics development involves providing children with opportunities to practise and improve their skills in counting numbers, calculating simple addition and subtraction problems, and to describe shapes, spaces, and measures.</p>	
ELG 11	<p>Numbers: Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer. They solve problems, including doubling, halving and sharing.</p>
<p>Explanatory note: <i>Within play and other practical situations, the child counts and orders numbers from 1-20 and finds one more or one fewer than a given number.</i></p> <p><i>Using every day and play objects, the child applies a range of strategies to add and subtract quantities involving two single-digit numbers such as counting on to add and counting back to subtract.</i></p> <p><i>In a range of practical and play contexts the child explores and solves problems involving doubling, halving and sharing, utilising his or her own methods.</i></p>	
ELG 12	<p>Shape, space and measures: Children use everyday language to talk about size, weight, capacity, position, distance, time and money to compare quantities and objects and to solve problems. They recognise, create and describe patterns. They explore characteristics of everyday objects and shapes and use mathematical language to describe them.</p>
<p>Explanatory note: <i>The child uses everyday language to share their thinking about size, weight, capacity, position, distance, time and money.</i></p> <p><i>The child demonstrates that they understand that one quantity is different to another even if they do not know the correct comparative term.</i></p> <p><i>The child is able to recognise and describe patterns and notices them in the environment. The child makes patterns using a range of media and resources.</i></p> <p><i>The child notices and describes everyday objects and shapes using appropriate mathematical language.</i></p>	

Specific areas of learning	
<p>Understanding of the world involves guiding children to make sense of their physical world and their community through opportunities to explore, observe and find out about people, places, technology and the environment.</p>	
ELG 13	<p>People and communities: Children talk about past and present events in their own lives and in the lives of family members. They know that other children don't always enjoy the same things, and are sensitive to this. They know about similarities and differences between themselves and others, and among families, communities and traditions.</p>
<p>Explanatory note: <i>The child communicates about events involving them and family members, now and in the past. They listen, comment and show sensitivity towards other children's experiences, communities and traditions which may be the same or different to their own. This may be demonstrated through their behaviour, actions or communications.</i></p>	
ELG 14	<p>The world: Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one to another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p>
<p>Explanatory note: <i>The child has a curiosity and interest about the immediate environment around them and recognises when things have similar or different features. Whilst exploring through play and real experiences, the child shows their learning and understanding of living things, materials and objects. The child investigates, notices changes and interacts with elements of their natural and manufactured environment. He or she communicates about what is happening and why.</i></p>	
ELG 15	<p>Technology: Children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes.</p>
<p>Explanatory note: <i>Through discussion, play and practical application the child demonstrates that he or she knows about technology and its use in his or her life and local environment. The child chooses the technological opportunities around him or herself as a tool to enhance and extend his or her learning.</i></p>	

Specific areas of learning	
<p>Expressive arts and design involves supporting children to explore and play with a wide range of media and materials, as well as providing opportunities and encouragement for sharing their thoughts, ideas and feelings through a variety of activities in art, music, movement, dance, role play, and design and technology.</p>	
ELG 16	<p>Exploring and using media and materials: Children sing songs, make music and dance, and experiment with ways of changing them. They safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.</p>
<p>Explanatory note: <i>For the purpose of assessing this ELG:</i></p> <ul style="list-style-type: none"> ● <i>processes are more important than the finished product which need not necessarily occur;</i> ● <i>music is any generation of sound with intent to represent an idea or feeling; and</i> ● <i>dance is any form of movement by which children express themselves, emotions or responses.</i> <p><i>The child may recall and sing songs independently as he or she engages with other activities. The child creates and explores music and dance in their own way; they experiment and change sounds and movements in their play.</i></p> <p><i>The child uses a variety of materials, tools and techniques safely through an exploration of colour, design, texture, form and function.</i></p>	
ELG 17	<p>Being imaginative: Children use what they have learnt about media and materials in original ways, thinking about uses and purposes. They represent their own ideas, thoughts and feelings through design and technology, art, music, dance, role play and stories.</p>
<p>Explanatory note: <i>For the purpose of assessing this ELG:</i></p> <ul style="list-style-type: none"> ● <i>processes are more important than the finished product which need not necessarily occur;</i> ● <i>music is any generation of sound with intent to represent an idea or feeling; and</i> ● <i>dance is any form of movement by which children express themselves, emotions or responses.</i> <p><i>The child explores and experiments in a variety of imaginative ways in response to a range of creative stimuli.</i></p> <p><i>The child may use their prior knowledge and experience to express their ideas in original ways, making informed choices.</i></p>	

6. Moderation of the EYFS Profile

6.1 Purpose of moderation

Local authorities are responsible for providing a robust moderation process so that practitioner judgements are evaluated in line with statutory requirements.

The purpose of moderation is to:

- secure the consistency and accuracy of judgements made by different practitioners;
- reassure practitioners that their judgements are accurate, valid and consistent with national standards; and
- assure moderators that an acceptable level of accuracy and validity has been achieved for assessments recorded and reported by the settings for which they have responsibility.

Moderation of the EYFS Profile is a sampling process – unlike testing – and so it is not a method for checking each child’s attainment. Local authority moderation visits check the ability of teachers to make accurate assessments and apply them consistently.

Moderation involves internal moderation activities and professional dialogue between moderators and practitioners. This is to ensure that practitioners’ judgements are consistent with national standards and the assessment process is reliable, accurate and secure.

The EYFS Profile provides an holistic picture of a child’s attainment at the end of the EYFS in relation to the ELGs. Everyone needs to feel confident that the recorded judgements are fair and consistent for all children so that judgements made for any one child are comparable with those made for all children. Processes to achieve comparability will involve practitioners working with each other throughout the year alongside an annual programme of agreement activity within each local authority.

The starting point for the agreement of judgements should be the ELGs illustrating the level of development expected at the end of the EYFS for each ELG and their exemplification. Practitioners will need to work with each other and with local authority moderators to achieve consistent understanding of the ELGs so that comparable best fit judgements can be made.

6.2 Internal moderation

The moderation of EYFS Profile assessments begins within each individual setting and is supported by local authorities or local authority approved agencies through a programme of visits and meetings. Within their own settings, practitioners can agree assessment judgements with others. Informally, this might involve two practitioners, for example a teacher and a teaching assistant or a Reception class teacher and a Year 1 teacher, discussing an observation about a child’s development.

A more formal agreement process might take place during staff meetings and/or staff training days. An example could be discussion of planned paired observations or the

development of a group of children in relation to one of the ELGs. The focus for this planned work should be clear and manageable. Local authority moderators will support this work during visits or meetings.

It is important for practitioners to build a shared understanding of the ELGs and the national exemplification of standards and to discuss their assessment of children's attainment with colleagues. Settings may wish to collaborate so that practitioners from a range of different settings can share experience to develop their assessment skills.

6.3 Local authority requirements for moderation

Section 13 of the Childcare Act 2006 requires local authorities to secure the provision of information, advice and training, whether delivered by themselves or by others, to meet the needs of local providers and support the sufficiency of childcare provision. Regulations made under this section include ensuring that:

- training in EYFS assessment and the completion of the EYFS Profile summaries is offered to all providers who require it;
- EYFS Profile assessment judgements are moderated;
- local authorities appoint and train moderators with appropriate experience of the EYFS and the ELGs to secure consistent standards in assessment judgements; and
- all providers are visited regularly as part of a cycle of moderation visits, and notified about whether the EYFS Profile assessment is being carried out in accordance with requirements.

Where the local authority moderator judges that the assessment is not in line with the exemplified standards, the local authority can require the provider to arrange for the practitioner to participate in further training or moderation activities, and to reconsider their assessments as advised by the moderator.

Moderation focuses on a professional dialogue between moderators and practitioners in order to ensure that practitioner judgements are consistent with the national exemplification of standards, and that the assessment of attainment is reliable, accurate and secure. Local authorities must moderate all 17 ELGs annually in a minimum of 25 per cent of all settings which implement the EYFS Profile.

Local authority moderation consists of the validation of practitioner judgements within visits carried out by a suitably experienced and trained moderator external to the setting.

All practitioners implementing the EYFS Profile are required to take part in either a moderation visit or EYFS Profile training (including agreement trialling activities) each year. Visits will take place on a four year cycle within each local authority. Specific guidance about moderation measurements, including the requirements for academies and Free Schools, can be found in the EYFS ARA which is available on the Department's website at www.education.gov.uk/assessment.

Local authorities should inform settings that are to receive an EYFS Profile moderation visit at the end of the spring term. For moderation purposes, these settings will need to complete interim judgements against all the ELGs at the beginning of May for children in the final year of the EYFS. Individual settings can be added to the local authority sample after this date, if particular issues arise.

6.4 STA external moderation of local authority moderation models

To fulfil its remit, STA visits a number of local authorities during the summer term, in order to undertake external moderation of their approaches and procedures. A representative sample of local authorities will be visited each year.

The role of STA's external moderators is to visit the local authorities that make up the annual national sample, and to examine approaches to implementation and moderation of the EYFS Profile by:

- attending a moderation visit undertaken by the local authority;
- meeting with the EYFS Profile moderation manager and appropriate personnel to discuss the approaches to moderation, training and support; and
- reporting to STA on the quality of the local authority's approaches to moderation and the robustness of the model employed.

6.5 Moderation training cycle

Training will focus on all 17 ELGs of the Profile over a three-year cycle, set out in the table below. This training should be in addition to support provided by the local authority for newly qualified teachers and those new to Reception.

School year	Moderation visits	Moderation training and ELG focus
2012/13	25% of settings (minimum)	All settings to attend training focussing on the principles, procedures and processes of completing the EYFS Profile. This initial training should include the opportunity for agreement trialling by practitioners.
2013/14	25% of settings (minimum)	75% of settings not receiving a moderation visit (minimum) Prime area of learning: Communication and language development Specific area of learning: Mathematics
2014/15	25% of settings (minimum)	75% of settings not receiving a moderation visit (minimum) Prime area of learning: Physical development Specific area of learning: Understanding the world and expressive arts and design
2015/16	25% of settings (minimum)	75% of settings not receiving a moderation visit (minimum) Prime area of learning: Personal , social and emotional development Specific area of learning: Literacy

School year	Moderation visits	Moderation training and ELG focus
2016/17	25% of settings (minimum)	75% of settings not receiving a moderation visit (minimum) Prime area of learning: Communication and language development Specific area of learning: Mathematics

6.6 The moderation of children with outcomes in the emerging band

The purpose of moderation is the validation or otherwise of practitioner judgements. Where these judgements are that the child is at an emerging level of development, the moderation dialogue must reference both the description of the expected level of development (the ELG) and the age related descriptions set out in Development matters so that the practitioner's understanding and application of the threshold between an emerging and expected outcome can be evaluated.

This evaluation must be applied on an individual ELG basis. There will be many children with SEND who are at the expected or exceeding level of development for some goals, and at an emerging level for those goals where their specific condition has an impact on their learning and development. There will also be children for whom outcomes at the end of EYFS as captured by the EYFS Profile will be at the emerging level for all ELG and it is important that moderation of such a pattern of outcome is a meaningful process.

Moderation should maintain its purpose of evaluating the accuracy of practitioner judgements at individual ELG level whatever the pattern of a child's EYFS Profile outcomes

Where an outcome of emerging appears clear-cut, and limited moderation dialogue may be required to ascertain accuracy of a best-fit judgement, moderation should aim to ensure that the learning characteristic narrative highlights those aspects of the child's learning and development which may be masked by the 17 ELG outcomes.

For children with SEND, practitioners will seek to provide such additional detail as is needed to support successful transition to Year 1 and enable the Year 1 teacher to plan an effective, responsive and appropriate curriculum. Consideration of some of this information within the moderation dialogue will strengthen the outcome of moderation, by focussing on the holistic picture of the child and the professional knowledge of the practitioner, and support the development of a shared understanding of how the EYFS Profile can be used to support successful transition for children with SEND.

Discussion between a moderator and practitioner may be especially helpful where a child's specific circumstances are such that their development does not follow a linear path through the agebands of Development matters, so that making a best-fit judgement as to their level of learning and development may be both problematic and of limited meaning.

6.7 The moderation of children with outcomes in the exceeding band

The purpose of moderation is the validation or otherwise of practitioner judgements. Where these judgements are that the child is at an exceeding level of development, the moderation dialogue must reference both the description of the expected level of development (the ELG) and refer to Key Stage 1 attainment targets and level descriptors together with the exceeding descriptors (sourced from the Tickell review) as per Annex 2.

This process must be applied on an individual ELG basis, and there may be children whose learning and development is at an exceeding level for some goals and at an expected level for others.

Where this is the case, a differentiated curriculum should be planned to ensure there is enough challenge to extend the child's learning within a practical, relevant and meaningful environment in all 17 ELGs rather than channelling the child's learning in one or two ELGs.

Regardless of any internal school arrangements, an EYFS profile must be completed for the child in line with statutory reporting requirements.

6.8 Key elements of an effective moderation process

The following table sets out the requirements for robust local authority moderation processes and procedures, and identifies key elements and examples of the most effective practice. The requirements, set out across the top of each section, draw on the Statutory framework for the EYFS, (published in March 2012), which available from the Department's website at www.education.gov.uk/eyfs.

The sections in the table below can be cross referenced with the evaluation and planning forms sent annually to all local authorities.

A: Moderation plan	
The local authority should plan an annual programme to ensure that their statutory duty in relation to the moderation of the EYFS Profile judgements is met.	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> ● Before implementation, details of the moderation plan are shared and agreed with all settings which will complete EYFS Profiles. ● The moderation plan includes a specific appeals procedure in relation to the moderation of EYFS Profile judgements. (In the event that an appeal remains unresolved, the local authority moderation manager must notify STA.) ● The moderation process is evaluated each year in consultation with all stakeholders. The plan is revised accordingly. 	<ul style="list-style-type: none"> ● Details of the moderation process are communicated to all relevant stakeholders early in the autumn term. ● The stakeholder group includes: <ul style="list-style-type: none"> ● local authority colleagues ● headteachers/managers of settings ● practitioners ● moderation team ● local authority data teams
B: Moderation team	
In order to carry out the statutory role of moderator, the moderation team should have a thorough understanding and experience of the principles and practice of the EYFS Profile and appropriate experience of the EYFS.	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> ● The moderation team includes both local authority personnel and serving practitioners with appropriate and recent EYFS experience. ● Moderators are trained and participate regularly in local authority moderation activities, using exemplification of national standards to ensure consistency. ● The local authority has an effective process for the recruitment of new moderators as appropriate. ● Moderators new to the role undertake a suitable induction process. 	<ul style="list-style-type: none"> ● All moderators undertake the full range of moderation activity. ● Moderators are recruited who have the appropriate skills and capabilities to carry out their role. ● As part of their induction newly appointed moderators have access to a mentor and opportunities to shadow a more experienced colleague. <p>(A suggested role description for moderators can be found in Annex 4.)</p>

C: Inter-authority moderation	
Local authority moderators will need to work with other moderators so that assessment is consistent nationally.	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> The moderation manager participates regularly in inter-local authority moderation activities. 	<ul style="list-style-type: none"> All moderators participate regularly in inter-local authority moderation activities, using exemplification of national standards to ensure consistency. Pairing arrangements between moderators from different local authorities provide opportunities for the promotion of consistency.
D: Moderation cycle	
Local authorities should ensure that all 17 ELG of the EYFS Profile are moderated annually in a 25 per cent sample of settings. All practitioners responsible for the completion of the EYFS Profile who are not receiving a moderation visit must take part in training which includes an element of agreement trialling.	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> All settings receive a moderation visit on a four-year cycle. All 17 ELGs of the EYFS Profile are moderated annually: moderation does not focus on a specific area of learning or set of ELGs at the expense of others. All practitioners responsible for the completion of the EYFS Profile who are not receiving a moderation visit in the current year must take part in training which includes an element of agreement trialling. Moderation visits take place during the summer term. 	<ul style="list-style-type: none"> The moderation cycle includes opportunities for supportive visits throughout the year as preparation for the final moderation visit, during which the accuracy of judgements is established. In addition to planned visits to all settings on a four-year cycle, moderation visits/support may be triggered by: <ul style="list-style-type: none"> presence of NQTs and practitioners new to the EYFS requests from the headteacher/manager concerns identified by the school improvement partner or local authority personnel data anomalies non-attendance at training events.

E: Moderation visits

As part of their statutory duty for moderation, local authorities are required to visit schools and settings implementing the EYFS Profile on a regular basis. This should be on a four year cycle so that 25 per cent of settings are visited each year.

Key elements	Examples of most effective practice
<ul style="list-style-type: none"> • The moderation visit focuses on a professional dialogue between the moderator and each practitioner responsible for completing EYFS Profiles. • The moderator establishes whether EYFS Profile assessment has been undertaken in accordance with statutory requirements and is in line with exemplified national standards. • Visits take place at an agreed time within the school day, with practitioners released for the duration of the visit. • The moderator establishes the accuracy and consistency of practitioner judgements by scrutinising a range of evidence, the majority of which will come from the practitioner's knowledge of the child and observations of the child's self-initiated activities. (Moderators must not scrutinise recorded evidence without the practitioner present.) • At the time of the visit, the practitioner provides the moderator with a list of the EYFS Profile interim outcomes for each child. The moderator selects five complete profiles across the range of attainment (emerging, expected and exceeding). These will form the basis of the moderation dialogue. • The moderator must ensure that within the constraints of the range of attainment available, practitioner judgements for all 17 ELGs are moderated. The moderator is unlikely to scrutinise all 17 ELGs for all five children, but will ensure that judgements are moderated from each of the three outcome bands (emerging, expected and exceeding). • For each ELG the moderator establishes whether the EYFS Profile assessment is being carried out in accordance with statutory requirements and whether practitioner judgements are accurate. 	<ul style="list-style-type: none"> • Information meetings are held for settings that are to receive a moderation visit prior to visits taking place. • Local authorities ensure that practitioners are familiar with any additional STA guidance materials and moderators reference these where relevant during the moderation visit. • The headteacher/manager, senior leadership team, subject leaders and Year 1 teachers have opportunities to participate in elements of the moderation visit. • Contributions from parents or carers and the child are actively sought by practitioners; and are used to inform the judgements made for the EYFS Profile. • The local authority has an effective system to follow up any advised actions. <div style="border: 1px solid black; padding: 10px; margin-top: 10px;"> <p>When moderating EYFS Profile judgements in multiple form entry schools, moderators must ensure that all practitioners participate in the moderation dialogue. Moderators should ensure that the judgements moderated cover all 17 ELGs including judgements from all three attainment bands for each class.</p> </div> <p>An example visit note can be found in Annex 5.</p>

E: Moderation visits (continued)	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> • Ensure that judgements are validated throughout the professional dialogue. • Outcomes of internal moderation are considered within the moderation dialogue. Moderators establish how settings develop and use internal moderation processes. • At the end of the visit, the moderator informs the headteacher/manager of the outcome of moderation. • Where the moderator judges that the assessment is not in line with exemplification of national standards, the local authority can require the headteacher/manager to both reconsider the practitioner's judgements as advised by the moderator and arrange further CPD opportunities for the practitioner. 	
F: Specific EYFS Profile training	
<p>Specific training, which includes agreement trialling, is provided annually to ensure that EYFS Profile assessments are in line with the requirements set out in the EYFS statutory framework.</p>	
Key elements	Examples of most effective practice
<ul style="list-style-type: none"> • Specific EYFS Profile training, which includes agreement trialling, is provided for all practitioners (see section 6.5 for plans for 2014 onwards). • Training focuses on all 17 ELGs over a three-year cycle. • Exemplification of national standards is used to support training and ensure national consistency with regard to the principles and processes of EYFS profile assessment and the accuracy of judgements. • Systems are in place to monitor the attendance at all training events and non-attendance is followed up where appropriate. 	<ul style="list-style-type: none"> • Additional training is provided, specific to the context and needs of the local authority. • Within the local authority there is an expectation that all stakeholders will attend training in order to ensure their knowledge and understanding of the EYFS Profile is up to date. • The agreement trialling element of the training focusses on the practitioner's own evidence which has informed their judgements. • The local authority has a system in place to follow up concerns raised by those attending training. • Invitations to training are extended to other practitioners e.g. Year 1 teachers, assessment leaders, headteachers/ managers and subject coordinators.

G: Data collection and analysis

Local authorities are required to collect EYFS Profile data by Saturday 22 June. This collection (and subsequent return to the Department where required) should be carried out in line with the EYFS ARA.

Key elements	Examples of most effective practice
<ul style="list-style-type: none"> • All EYFS providers have an appropriate system to record and submit EYFS Profile data. • The local authority informs all settings of the EYFS profile completion window (Tuesday 11 to Saturday 22 June 2013) and makes appropriate arrangements for the submission of data. 	<ul style="list-style-type: none"> • The local authority moderation manager has an effective working relationship with both the local authority, schools' IT and data analysis teams. Systems for the collection, submission and analysis of EYFS Profile data are evaluated and developed each year. • Local authorities provide a helpdesk or other means of support for the data collection system, and training is provided for any personnel new to the process.

H: Quality assurance of EYFS Profile data

Settings and local authorities should have quality assurance processes in place to ensure that the data submitted for each child is an accurate reflection of their attainment.

Key elements	Examples of most effective practice
<ul style="list-style-type: none"> • Headteachers/managers take responsibility for the reliability of the EYFS Profile outcomes and ensure that the data accurately reflects the attainment of their cohort of children. • The local authority has an effective process for the quality assurance of EYFS Profile data prior to submission to the Department. EYFS Profile data from settings is scrutinised by the moderation manager and the local authority data team. • The local authority allocates adequate time for the quality assurance of data prior to submission to the Department. • The local authority scrutinises data at a level of detail that enables anomalies to be identified and highlighted to settings for review and amendment (where necessary). • Amendments to EYFS Profile outcomes are made prior to submission to the Department. 	<ul style="list-style-type: none"> • The exploration of anomalies reflects an understanding of local circumstances and priorities. Any sampling of data for scrutiny takes place with regard to local intelligence. • Systems for the quality assurance of EYFS Profile data are evaluated and developed each year. • The need for accuracy in EYFS Profile data is embedded in training for all stakeholders.

I: Use of data to support planning in Year 1

One of the main purposes of the EYFS Profile is to inform the Year 1 teacher of the attainment of each child. This will enable the teacher to plan an effective, responsive and appropriate curriculum that will meet children's needs.

Key elements	Examples of most effective practice
<ul style="list-style-type: none"> ● Opportunities are provided to help Year 1 teachers understand and use EYFS Profile data effectively so that they can plan a curriculum that meets the needs of all children. ● Year 1 teachers participate in internal EYFS Profile moderation within the school. 	<ul style="list-style-type: none"> ● Transition processes are developed and evaluated each year in response to EYFS Profile outcomes, in order to reflect the needs of the current cohort. ● Training is provided for Year 1 teachers focussed on the understanding and interpretation of EYFS Profile outcomes and how these may be used to support transition, provision and planning in Year 1. ● Year 1 teachers participate in local authority moderation visits and training events.

7. Quality assurance of the EYFS Profile

EYFS Profile data must be sufficiently reliable and accurate to meet its purposes (see section 2.1). There are a number of quality assurance activities to ensure that there is accurate, reliable and valid information that can be used to improve outcomes for all children. These include:

- teachers and practitioners meeting within a school and between schools or settings, to develop a consistent understanding of the ELGs;
- external moderation visits organised by the local authority; and a quality assurance review by the local authority after data has been submitted.

Quality assurance of EYFS Profile data has two main elements:

- to ensure that the pattern of outcomes for an individual child makes sense in relation to wider knowledge of children's learning and development; and
- to ensure that the resulting data is an accurate record of practitioner judgements.

Practitioners, school managers, setting leaders and local authorities have responsibility for ensuring the quality, accuracy and reliability of data arising from EYFS Profile assessment.

7.1 The pattern of outcomes for an individual child

The moderation process includes considering the pattern of attainment for children in the selected sample. Local authorities are responsible for providing a robust moderation process so that practitioner judgements are evaluated in line with statutory requirements. It is important that settings carry out a 'sense check' of outcomes for all children for whom an EYFS Profile judgement has been made, so that an accurate picture of their learning and development is provided for parents and Year 1 teachers.

Consideration of any EYFS Profile outcome must include both the judgements against the ELG statement of the level of development expected at the end of the EYFS, and the narrative record of the child's characteristics of effective learning. It is the information contained within the narrative for the characteristics of effective learning which will enable the patterns of attainment to be placed in the necessary context so that the accuracy of the EYFS Profile outcome can be evaluated effectively.

The following statements could support setting-level quality assurance processes in terms of scrutiny of the pattern of attainment for individual children. Each child's pattern of attainment will reflect their learning and development outcomes. Where this pattern does not match what might be anticipated, the prompts may provide a starting point for a dialogue with the practitioner making the judgement. An unexpected pattern of attainment, however, does not necessarily mean that any individual child's EYFS Profile outcomes are inaccurate, as the following examples demonstrate.

1. A child's outcomes are consistently exceeding ELGs but the characteristics of effective learning describe a child who lacks interest and excitement to learn. Whilst this scenario is possible, high attainment is often associated with interest in

learning. It is essential to link the commentary within the learning characteristics to the attainment of the ELGs.

2. A child's ability to communicate effectively threads through many of the ELGs. A child whose outcome for Speaking is at the emerging level may also show emerging attainment for those ELGs with a significant communication element. These include Self-confidence and self-awareness; Managing feelings and behaviour; Understanding; Shape, space and measures; People and communities and Knowledge of the world.
3. A child meets the level of development expected at the end of EYFS for Reading but does not do so for Listening and attention. The Reading ELG includes elements which rest upon a child using significant skills relating to listening and attention.
4. A child meets the level of development expected at the end of the EYFS for Writing but does not do so for Physical development (moving and handling). Whilst the ability to hold and manipulate a pencil effectively is only part of the Physical ELG, a child whose physical development in relation to fine motor movements is at the emerging level may not be a confident and independent writer as expressed by the Writing ELG.
5. Some elements of the Expressive arts ELGs depend on a child's physical ability to explore and manipulate media with confidence, including construction materials. A child with emerging physical (moving and handling) skills may not attain the level of development expected at the end of the EYFS in relation to these creative ELGs.
6. A child who is at the level of development expected at the end of the EYFS for Shape, space and measures and Knowledge of the world is likely to be using the skills and attributes which would contribute towards attainment of the level of development expected at the end of the EYFS for Understanding.

It should be remembered throughout quality assurance that children with specific SEND may be assessed in relation to their ability to communicate, for example, without the need for speech. Any exploration of patterns of attainment should take into account the contextual information for individual children which underpin accurate assessment.

7.2 The role of settings in quality assurance

Schools settings have responsibility for ensuring the quality, accuracy and reliability of data arising from EYFS Profile assessment; practitioners have a central role to play in ensuring that judgements are reliable and accurate. Practitioners need to be familiar with the ELGs and their exemplification if they are to apply them consistently.

In each school, Early Years practitioners and Year 1 teachers should work together to build a consistent, shared understanding of what the ELGs mean via internal moderation activities. Practitioners in groups of schools may also wish to work together in this way.

It is particularly important that Year 1 teachers understand the EYFS Profile, so that they can make effective use of it to inform their teaching. Year 1 teachers should be encouraged to play a role as moderators.

Headteachers and managers have responsibility within their settings for the accuracy of EYFS Profile outcomes. They should be actively involved in the quality assurance process within the setting prior to submission to the local authority, and later if the local authority quality assurance process generates enquiries.

7.3 Data entry and submission

Accurate data entry relies on good communication and shared understanding between those providing information and those responsible for entering and transmitting the resulting data.

The EYFS Profile is a statutory data collection. Each child's records are combined at setting, local authority and national level to produce a data set which has national statistics status and informs a range of processes.

The process of data collection, entry and submission should be planned in advance, with sufficient time included for the resolution of queries and visual checking of data once entered. Understanding and recognition of common input errors is vital. It is therefore essential that local authorities give clear information to settings so that they understand how data should be formatted.

Efficient and high quality data submission relies on several features and processes, each of which should be established within the setting to ensure accuracy from the outset. These are set out below:

1. An understanding of settings' systems for the recording of children's profile outcomes and the submission of the data to the local authority.
2. Clear recording by the practitioner.
3. Understanding of the nature of EYFS Profile data by all those responsible for data collection and submission.
4. Accurate transcription of data from setting record to electronic record.
5. Checking of entered data against that originally provided by the practitioner.
6. Accurate and updated recording of children's information which accompanies EYFS Profile data, for example postcode and unique pupil number (UPN).
7. Final checking and sign-off by the headteacher/manager prior to submission to the local authority.

The headteacher/manager should only sign off item level data, and permit onward transmission to the local authority, after checking that there are no input errors and the data is an accurate reflection of the attainment of the cohort.

7.4 Local authority review of submitted data

Once EYFS Profile data is received by the local authority, the validity and accuracy of that data should be scrutinised by both moderation and data professionals so that an accurate local data set is prepared for onward submission to the Department. The focus of scrutiny may be different for each of these teams, but there is likely to be overlap and best practice will result from combined processes with shared responsibility.

Local authorities should explain their quality assurance processes to settings early in the data collection cycle. This will ensure timescales and expectations are well established, and appropriate activity planned at setting and local authority level. Timings should allow for:

- scrutiny by local authority data and moderation teams;
- the raising of enquiries with settings;
- the resolution of these enquiries; and
- the submission of amended data if required.

Data passes from local authorities to the Department via the COLLECT data collection system. Data collection requirements include timescales for submission and a range of validation checks which data must pass in order to be accepted by the Department. These are the subject of dialogue between the Department and local authorities; the Department provides clear information regarding expectations and processes annually ahead of the national data collection. Data validation ensures the alpha-numerical consistency of specific data items.

Beyond data validation, local authority moderation managers should seek to ensure that the local EYFS Profile data set presents an accurate picture of children's learning and development at the end of the EYFS within their local authority. This could include a range of measures to check a further sample of outcomes, or a cross checking of outcomes against those anticipated as a result of moderation. The nature of any sampling should be transparent and shared with settings prior to data collection.

The following questions may support local authorities when considering the accuracy of their EYFS Profile data set prior to submission to the Department.

1. Does the setting's data reflect local authority knowledge of the cohort or outcomes of moderation?
2. Is there a difference in data between classes where there is multiple form entry?
3. Is the setting's data significantly or unexpectedly adrift from local authority data?
4. Are there patterns of attainment which are unexpected in terms of what is known about children's learning and development in general?
5. Are trends from year to year unexpected?

Effective quality assurance rests on knowledge both of EYFS Profile assessment and of the schools and settings which are returning data. As set out in section 6.2 above, these questions are prompts for a dialogue rather than rules which data must obey. Quality assurance may also include a 'first cut' data analysis and feedback from the local authority to the setting, which may be beneficial for a setting's internal evaluation and transition processes.

If moderation managers highlight a potential inconsistency in a setting's data set, they must ensure that headteachers/managers have enough time to discuss the data with setting staff and provide a response in sufficient detail to resolve the enquiry. Where data needs to be amended, clear arrangements must be in place to enable amendment, headteacher/manager sign-off and re-submission before the end of the summer term. This should be coordinated with the local authority data team so that duplicate data sets are not created and the correctly amended data is included in the final local submission to the Department.

8. Glossary

Achievement

Takes account both of a child's attainment and progress over time.

Active learning

Refers to motivation comprising three aspects:

- being involved and concentrating
- keeping on trying
- enjoying achieving what they set out to do.

Agreement trialling

The process of discussing assessment judgements in a group in order to ensure that all practitioners understand the national exemplification of standards and apply them consistently.

Area of learning

Refers to the grouping of children's learning and development into seven areas. There are three prime areas which focus on the earliest experiences which are foundations for learning: Personal, social and emotional development, Communication and language and Physical development. There are four specific areas in which the prime skills are applied: Literacy, Mathematics, Expressive arts and design, and Understanding the world.

Aspect of learning

The strand of specific focus within an area of learning. For example, Personal, social and emotional development has three aspects: Self-confidence and self-awareness, Managing feelings and Behaviour and making relationships.

Assessment

Involves analysing and reviewing what is known about each child's learning and development to reach informed decisions about the child's level of attainment.

Attainment

What a child knows, understands and can do.

Best fit

Making a judgement as to whether the child's learning and development is best described by:

- the expected description for each ELG;
- not yet at the expected level (emerging); or
- beyond the level expected at the end of the EYFS (exceeding).

To create the most accurate picture of the child's overall embedded learning an holistic view of the descriptor should be taken. Practitioners must consider the entirety of each ELG and avoid splitting the descriptor into sections.

Because children do not necessarily achieve uniformly, the practitioner should judge whether the description within the ELG best fits the child's learning and development, taking into account their relative strengths and weaknesses. 'Best fit' does not mean that the child has equal mastery of all aspects of the ELG.

In making this decision, practitioners must refer to the exemplification within this document. The exemplification illustrates the standard expected for each ELG at the end of the EYFS.

Characteristics of effective learning

The three characteristics of effective learning comprise playing and exploring, active learning and creating and thinking critically. The characteristics describe the different ways children learn rather than what they learn. They begin at birth and are lifelong characteristics which are critical for building children's capacity for future learning. These characteristics need to be understood by practitioners working across all seven areas of learning.

Child initiated

The action of a child choosing to extend, repeat or explore an activity. This activity may or may not have been introduced or prompted by an adult. It is the child's innovation within or of the activity which is important and relevant to child initiation. An adult may be present and may be supportive but not directive. For example an adult may be supporting the child to realise an idea by providing necessary resources, or by engaging in thought provoking conversation. Child initiated activity and exploration provides an important insight into the depth of a child's learning. When learning is fully mastered the child is able and motivated to employ that learning unprompted.

Creating and thinking critically

Refers to thinking comprising three aspects:

- having their own ideas;
- using what they already know to learn new things; and
- choosing ways to do things and finding new ways.

Early learning goal (ELG)

A collection of statements which sets out the expected level of attainment at the end of the EYFS. There are 17 ELGs drawn from seven areas of learning.

Embedded learning

The learning that is demonstrated without the need for overt adult support. Where learning is secure, at whatever level, it is likely that children often initiate the use of that learning. Judgements about this are made through observing behaviour that a child demonstrates consistently and independently in a range of situations. Attainment in this context will assure practitioners of the child's confidence and ownership of the specific knowledge, skill or concept being assessed. Skilful interactions with adults and learning which is supported by them are necessary on the journey to embedding skills and knowledge. However, demonstrations of attainment which are often dependent on adult support are not examples of fully acquired skills and knowledge and are not embedded learning.

Emerging development

Describes attainment at a level which has not reached that expressed by the ELGs. Practitioners should refer to the descriptors of age bands in Development matters to determine which age band best describes a child's development.

Evidence

Any material, knowledge of a child, specific anecdotal incident, observation or information from additional sources that supports the overall picture of a child's attainment. There is no expectation or requirement that such evidence is always formally recorded or documented. Practitioners may choose to record specific evidence in order to secure their own judgements.

Expected development

Is the development expected by the end of the EYFS and is described by 17 ELGs drawn from seven areas of learning.

Exceeding development

Describes attainment beyond that which is expected by the end of the EYFS.

Formative assessment

Ongoing observation and assessment of children in order to make professional judgements about children's achievements and decide on the next steps in learning.

Internal moderation

Practitioners' agreement of assessment judgements with others within their own settings.

Level descriptor

Outlines the knowledge, skills and understanding required for each level of attainment in each subject of the National Curriculum.

Measuring progress

Involves comparing assessments of a child's attainment at different points in time to determine whether that child has made gains in learning and development.

Moderation

The dialogue based on a representative sample of judgements between moderators and practitioners which establishes:

- the consistency and accuracy of judgements made by different practitioners;
- whether the judgements about children's learning and development are in line with the nationally agreed exemplification; and
- whether the process of assessment provides for reliable, accurate and secure data.

Observation

Reaching an understanding of children's learning by watching, listening to, and interacting with children as they engage in activities and experiences and demonstrate their specific knowledge, skills and understanding.

Parents

The term 'parent' is used to refer to:

- parents of a child;
- any person who is not a parent of a child but who has parental responsibility for the child; and
- any person who has care of the child.

Playing and exploring

Refers to engagement comprising three aspects:

- finding out and exploring;
- using what they know in their play; and
- being willing to have a go.

Practitioner

Any adult who works with children in a setting.

Practitioner knowledge

Refers to the understanding reached about a child's attainment through observation of everyday activities and experiences. It is underpinned by specific examples and demonstrations of a child's attainment which may not be formally recorded.

Reception class

An entry class to primary school for children who have their fifth birthday during the school year and, where it is appropriate, including children who are younger or older than five. Defined by Section 142 of the School Standards and Framework Act 1998.

Responsible pedagogy

Enables each child to demonstrate learning in the fullest sense. It depends on the use of assessment information to plan relevant and motivating learning experiences for each child. Effective assessment can only take place when children have the opportunity to demonstrate their understanding, learning and development in a range of contexts.

Setting

Any out-of-home provider of Early Years provision for children from birth to five, such as childminders, local authority nurseries, nursery or Early Years centres, children's centres, playgroups, pre-schools, or schools in the independent, private or voluntary sector and maintained schools.

Stakeholder

A person or organisation that has an interest in the EYFS Profile assessments. The key stakeholders are parents and children. They also include staff in the setting, local authority and the Department who uses the information for a range of purposes.

Annex 1: EYFS Profile

Name.....

Age in months.....

Characteristics of effective learning	How (name of child) learns
<p>By playing and exploring:</p> <ul style="list-style-type: none"> ● finding out and exploring ● using what they know in their play ● being willing to have a go 	
<p>Through active learning:</p> <ul style="list-style-type: none"> ● being involved and concentrating ● keeping on trying ● enjoying achieving what they set out to do 	
<p>By creating and thinking critically</p> <ul style="list-style-type: none"> ● having their own ideas ● using what they already know to learn new things ● choosing ways to do things and finding new ways 	

Area of learning		Aspect	Emerging	Expected	Exceeding
Communication and language	ELG 01	Listening and attention			
	ELG 02	Understanding			
	ELG 03	Speaking			
Physical development	ELG 04	Moving and handling			
	ELG 05	Health and self-care			
Personal, social and emotional development	ELG 06	Self-confidence and self-awareness			
	ELG 07	Managing feelings and behaviour			
	ELG 08	Making relationships			
Literacy	ELG 09	Reading			
	ELG 10	Writing			
Mathematics	ELG 11	Numbers			
	ELG 12	Shapes, space and measures			
Understanding the world	ELG 13	People and communities			
	ELG 14	The world			
	ELG 15	Technology			
Expressive arts and design	ELG 16	Exploring and using media and materials			
	ELG 17	Being imaginative			

Annex 2: additional information for the exceeding judgement

The descriptors detailed below are sourced from the Tickell Review. They act as guidance to support the process of making a judgement that a child's level of learning and development is in the exceeding category. Please refer to section 2.3 for further information.

The areas of learning of EYFS and their associated exceeding descriptors

Prime areas of learning	
Communication and language	
01	Listening and attention: Children listen to instructions and follow them accurately, asking for clarification if necessary. They listen attentively with sustained concentration to follow a story without pictures or props and can listen in a larger group, for example, at assembly.
02	Understanding: After listening to stories children can express views about events or characters in the story and answer questions about why things happened. They can carry out instructions which contain several parts in a sequence.
03	Speaking: Children show some awareness of the listener by making changes to language and non-verbal features. They recount experiences and imagine possibilities, often connecting ideas. They use a range of vocabulary in imaginative ways to add information, express ideas or to explain or justify actions or events.
Physical development	
04	Moving and handling: Children can hop confidently and skip in time to music. They hold paper in position and use their preferred hand for writing, using a correct pencil grip. They are beginning to be able to write on lines and control letter size.
05	Health and self-care: Children know about and can make healthy choices in relation to healthy eating and exercise. They can dress and undress independently, successfully managing fastening buttons or laces.
Personal, social and emotional development	
06	Self-confidence and self-awareness: Children are confident to speak to a class group. They can talk about the things they enjoy, and are good at, and about the things they don't find easy. They are resourceful in finding support when they need help or information. They can talk about the plans they have made to carry out activities and what they might change if they were to repeat them.
07	Managing feelings and behaviour: Children know some ways to manage their feelings and are beginning to use these to maintain control. They can listen to each other's suggestions and plan how to achieve an outcome without adult help. They know when and how to stand up for themselves appropriately. They can stop and think before acting and they can wait for things they want.
08	Making relationships: Children play group games with rules. They understand someone else's point of view can be different from theirs. They resolve minor disagreements through listening to each other to come up with a fair solution. They understand what bullying is and that this is unacceptable behaviour.

Specific areas of learning	
Literacy	
09	Reading: Children can read phonically regular words of more than one syllable as well as many irregular but high frequency words. They use phonic, semantic and syntactic knowledge to understand unfamiliar vocabulary. They can describe the main events in the simple stories they have read.
10	Writing: Children can spell phonically regular words of more than one syllable as well as many irregular but high frequency words. They use key features of narrative in their own writing.
Mathematics	
11	Numbers: Children estimate a number of objects and check quantities by counting up to 20. They solve practical problems that involve combining groups of 2, 5 or 10, or sharing into equal groups. (This descriptor has been amended to reflect the increased level of challenge applied to the expected descriptor following the Tickell review.)
12	Shape, space and measures: Children estimate, measure, weigh and compare and order objects and talk about properties, position and time.
Understanding the world	
13	People and communities: Children know the difference between past and present events in their own lives and some reasons why people's lives were different in the past. They know that other children have different likes and dislikes and that they may be good at different things. They understand that different people have different beliefs, attitudes, customs and traditions and why it is important to treat them with respect.
14	The world: Children know that the environment and living things are influenced by human activity. They can describe some actions which people in their own community do that help to maintain the area they live in. They know the properties of some materials and can suggest some of the purposes they are used for. They are familiar with basic scientific concepts such as floating, sinking, experimentation.
15	Technology: Children find out about and use a range of everyday technology. They select appropriate applications that support an identified need – for example in deciding how best to make a record of a special event in their lives, such as a journey on a steam train.
Expressive arts and design	
16	Exploring and using media and materials: Children develop their own ideas through selecting and using materials and working on processes that interest them. Through their explorations they find out and make decisions about how media and materials can be combined and changed.
17	Being imaginative: Children talk about the ideas and processes which have led them to make music, designs, images or products. They can talk about features of their own and others work, recognising the differences between them and the strengths of others.

Annex 3: examples of some possible lines of enquiry to be followed when completing the commentary for each characteristic of effective learning.

Playing and exploring – engagement

Finding out and exploring is concerned with the child's open-ended hands-on experiences which result from innate curiosity and provide the raw sensory material from which the child builds concepts, tests ideas and finds out.

Possible lines of enquiry:

- Does the child respond to first hand experiences in an exploratory way?
- How does the child demonstrate natural curiosity?
- Does the child notice patterns, changes, similarities and differences when exploring across the curriculum?

Using what they know in their play describes how children use play to bring together their current understandings, combining, refining and exploring their ideas in imaginative ways. Representing experiences through imaginative play supports the development of narrative thought, the ability to see from other perspectives, and symbolic thinking.

Possible lines of enquiry:

- Does the child respond to first hand experiences in an exploratory way?
- How does the child demonstrate natural curiosity?
- Does the child notice patterns, changes, similarities and differences when exploring across the curriculum?

Being willing to have a go refers to the child finding an interest, initiating activities, seeking challenge, having a 'can do' orientation, being willing to take a risk in new experiences, and developing the view of failures as opportunities to learn.

Possible lines of enquiry:

- Does the child initiate activities around own interests?
- Does the child seek challenges and take risks in new experiences?
- Does the child learn from mistakes without becoming disheartened?

Active learning - motivation

Being involved and concentrating describes the intensity of attention that arises from children concentrating on following a line of interest in their activities.

Possible lines of enquiry:

- To what extent does the child become completely focussed in activities and experiences and not easily distracted?
- To what extent does the child show intensity of attention for example by being concerned about details in activities, experiences and ideas?

Keeping on trying refers to the importance of persistence even in the face of challenge or difficulties, an element of purposeful control which supports resilience

Possible lines of enquiry:

- Does the child pursue a particular line of interest in an activity?
- Does the child demonstrate persistence in the face of difficulty or a challenge?
- Can the child refocus and re-plan to overcome difficulties, setbacks and disappointments?
- Does the child know how to seek appropriate help in terms of materials, tools and other people?

Enjoying achieving what they set out to do refers to the reward of meeting one's own goals, building on the intrinsic motivation which supports long-term success, rather than relying on the approval of others.

Possible lines of enquiry:

- Does the child become involved in activities and experiences which arise out of personal interest, curiosity and enquiry?
- Does the child demonstrate satisfaction when engaged in and completing personal endeavours.

Creating and thinking critically

Having their own ideas covers the critical area of creativity – generating new ideas and approaches in all areas of endeavour. Being inventive allows children to find new problems as they seek challenge, and to explore ways of solving these.

Possible lines of enquiry:

- Does the child generate new ideas during activities?
- Does the child adapt, refine or make changes when previous ideas were unsuccessful or could be developed?
- Is the child inventive in solving problems, using and synthesizing knowledge and skills across areas of learning?

Using what they know to learn new things refers to the way in which children develop and link concepts, find meaning in sequence, cause and effect and in the intentions of others through both narrative and scientific modes of thought.

Possible lines of enquiry:

- Does the child talk about or explore the idea of cause and effect through actions?
- Does the child use acquired knowledge and skills to explore new learning across and within areas of learning?
- Does the child offer ideas of why things happen and how things work or show this in exploratory play?

Choosing ways to do things and finding new ways involves approaching goal-directed activity in organised ways, making choices and decisions about how to approach tasks, planning and monitoring what to do and being able to change strategies.

Possible lines of enquiry:

- Does the child explore ways of solving new problems including trial and error?
- Is the child able to plan and monitor what has been done?
- Can the child change strategies when appropriate?

Annex 4: role specification

Post-holders need to demonstrate the following knowledge, skills and experience in order to successfully perform the moderator's role:

- professional dialogue with the practitioner on a moderation visit ;
- the ability to establish and validate the accuracy of practitioner judgements in line with national exemplification materials ;
- effective verbal and written feedback to practitioners including recommendations for further training, if appropriate; and
- an understanding of the EYFS Profile moderation process

Knowledge and experience	
B.Ed., Cert. Education or other degree and PGCE	E
Knowledge and experience	
Current knowledge of EYFS and recent experience of teaching in an Early Years setting	E
Current knowledge of the principles and purpose of the EYFS Profile	E
Understanding of national exemplification materials	E
Knowledge of EYFS Profile moderation process	E
Experience of management and implementation of the EYFS Profile moderation	D
Evidence of further professional development (e.g. as advanced skills teacher or lead teacher)	D
Experience of working with children with special educational needs or with English as an additional language	D
Capabilities and skills	
To communicate effectively and be receptive to new information	E
To question and challenge practitioner judgements appropriately	E
To scrutinise, distil and interpret evidence and make decisions confidently	E
To provide feedback and remain objective in a range of circumstances	E
To build professional relationships with individuals and a group	E

Annex 5: blank exemplar moderation visit note

Name of school setting	
Headteacher/Manager	

Term/Year		Date of visit		Duration of visit	
Moderator name					
Practitioner names: NQT/new to Reception?/ Years in Reception?				Experience	
				Experience	

Please indicate below which ELG and level of development were moderated for each of the sampled profiles. Where practitioner judgements could not be validated for any ELG, please annotate the form and record the detail in the outcomes box.

Area of learning	ELG		Profile 1	Profile 2	Profile 3	Profile 4	Profile 5
Communication and language	ELG 01	Listening and attention					
	ELG 02	Understanding					
	ELG 03	Speaking					
Physical development	ELG 04	Moving and handling					
	ELG 05	Health and self-care					
Personal, social and emotional development	ELG 06	Self-confidence and self-awareness					
	ELG 07	Managing feelings and behaviour					
	ELG 08	Making relationships					
Literacy	ELG 09	Reading					
	ELG 10	Writing					

Area of learning	ELG		Profile 1	Profile 2	Profile 3	Profile 4	Profile 5
Mathematics	ELG 11	Numbers					
	ELG 12	Shapes, space and measures					
Understanding the world	ELG 13	People and communities					
	ELG 14	The world					
	ELG 15	Technology					
Expressive arts and design	ELG 16	Exploring and using media and materials					
	ELG 17	Being imaginative					

EYFS Profile judgements	
<p>Are judgements consistent and accurate?</p> <p>Is the evidence supporting the children's attainment appropriate?</p> <p>How does the evidence match the band descriptor?</p> <p>Consistent and independent behaviour?</p> <p>Appropriate child initiated/adult directed ratio?</p>	
Contributors to the process	
<p>Who contributes to the children's profiles within the school/setting?</p> <p>How are the parents' contributions valued and included within their child's profile assessments?</p> <p>How are the children's contributions represented in the profiles?</p>	
Strengths	
<p>Practitioners' knowledge of the children</p> <p>Internal moderation/linking with other settings</p>	

Agreed action points	
Headteacher to reconsider the judgements and ensure they are accurate - quality assurance	
Further training for practioners	
Informed of appeals procedure	

Practitioner judgements are ACCURATE ; in line with exemplification	Outcome <input type="checkbox"/>
Practitioner judgements are NOT ACCURATE ; in line with exemplification	<input type="checkbox"/>

About this publication

Who is it for?

Local authorities, headteachers, governing bodies and all Early Years education providers and education professionals with responsibility for assessing, reporting or moderating the EYFS Profile.

What does it cover?

- Information about why and how assessment should be carried out.
- Information about completing an EYFS Profile.
- Information about recording children's attainment.
- Information about making and moderating inclusive judgements for all children that are accurate and reliable.
